Dear Sir or Madam,

I really Believe that Lpfm should be created. Know that there will be no interference to full power existing stations because of its low amount of power. In comparison it would be like a Blue whale swallowing a guppy, know that it will not interfere with the new digital service as well. The people of are great land (mom and pop) and need to have the ability to support their community and communicate. The monopolies of big station have forgot about the community and our American families. There is also very few radio stations of ethnic diversity. We need low power especially micro radio under 10 watts. Small towns and rural areas will benefit greatly. It is also cost effective. The price of a license should be inexpensive and easy to obtain. Thank you so much for your time.
